Teacher quality is the single biggest lever impacting student success. A supported teacher is an effective teacher, and an effective teacher impacts the academic achievement, persistence in school, and long-term wellbeing of children, and can even influence income once young people enter the labor markets.

TeachUNITED equips educators with high-impact skills to ensure all students can reach their full potential.

**COACHING OPTIONS**

**TEACHER LEADERS**
Leadership development for teachers focused on creating engaging, data-driven, student-centered classrooms to reach ambitious student achievement goals and build internal coaching capacity within a school.

**VIRTUAL SCHOOL**
Rooted in the same research and framework as Teacher Coaching, this collaborative leadership development program is tailored to instruct on best practices, strategies, and outcomes for teaching and learning in a virtual setting.

**ADMINISTRATOR**
Supportive administrator coaching focused on the same strategies as teacher-facing coaching with additional tools designed to build alignment with staff to increase motivation, retention, and student impact.

**FOCUS COURSES**

Single topic, high-impact courses provide tangible tools for high-quality instruction.

- Student-Led Learning
- "What I Wish I'd Known": Support for Early Career Educators
- School Culture of Success (coming soon!)
CREATING SUSTAINABLE IMPROVEMENTS

UPON COMPLETION OF TEACHUNITED PROGRAMS

SCHOOLS

Develop in-house instructional coaches for sustainable, full-school learning and transformation.

TEACHER LEADERS

- Design online and in-person lessons that spark authentic engagement and build sustainable, engaged relationships with students.
- Harness the power of high impact strategies to build personalized direction, assessment, and reflection opportunities for students both in and out of the classroom.
- Lead other educators through the program for continued development and capacity building.

ADMINISTRATORS

- Help teachers develop growth mindsets through administrative practices.
- Conduct classroom evaluation/walkthroughs with TeachUNITED rubrics.
- Understand the connection between personalization and metacognition to support academic achievement.
- Build structures and strategies for creating data-driven PLCs.

Today’s webinar was timely, I was thinking about a staff member that seems to be struggling and got some ideas about how to help.

Wyoming Administrator

“It’s the right amount of information for the time. It’s great to take the time and discuss the information presented. So often you attend a webinar and they just throw information and more information at you.”

Massachusetts Teacher

Many thanks for all your time and effort getting us to such a good place. We are also thankful for your team’s expertise with data and indicators. It’s very satisfying to be working with TU as we’ve come to value your expertise and appreciate your ability to make an immediate connection with our school leaders. We look forward to the coming months of collaboration.

Marcia McCaffrey
Department of Education in New Hampshire, Bureau of Instructional Support
