

2020 **IMPACT REPORT**

Reshaping the future of education.

We envision a world where **every teacher, everywhere**, has opportunities for professional learning and support so that **every child has access to a quality education.**

Dear Friends and Supporters,

TeachUNITED was founded in 2016 with a mission of supporting and empowering small and rural community teachers to ensure every child can reach their full potential. With a model that helps teachers tangibly shift their practice for a proven impact on student outcomes, this mission is more relevant and urgent than ever.

2020 was an unprecedented year for education. Disruptions to schooling widened gaps for millions of kids, shined a spotlight on global inequities, and made it increasingly apparent that teachers need our focused attention and support.

Throughout this turbulent year, the TeachUNITED team and community of schools, partners, and supporters responded with tenacity and resilience, gave selflessly for the larger good, and stood together every step of the way — for a powerful and profound impact on kids and families.

Much remains to be done in overcoming educational inequality, but together our community truly moved the needle for underserved students in 2020. We will continue to build the platform for a better education and a brighter future for small and rural communities in the long term.

With our utmost gratitude,

Heather Hiebsch
Chief Executive Officer

Stephanie Cornell
Chair, Board of Directors

The Learning Crisis

Every child on the planet deserves access to an equitable and quality education.

Yet, more than half of the world's children are not learning critical math, literacy, and life skills.

Without these foundational skills in place, students often fail to thrive as they progress through school and join the workforce. Without action, more than 1.5 billion adults could be living in extreme poverty in 2050. Underserved and rural areas are the hardest hit.

We believe teachers are the solution.

OUR MISSION

To support and empower every educator so that they have the skills needed to fully develop each student's potential.

Scale & Sustainability

In line with [United Nations' Sustainable Development Goal #4: Quality Education](#) (SDG4), we invest in teachers on a global scale to drive local action that increases opportunity for every child.

What is UN SDG4?

The United Nations developed a unified agenda for sustainable development, which covers a broad series of global and local goals for peace and prosperity for people and the planet.

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all.

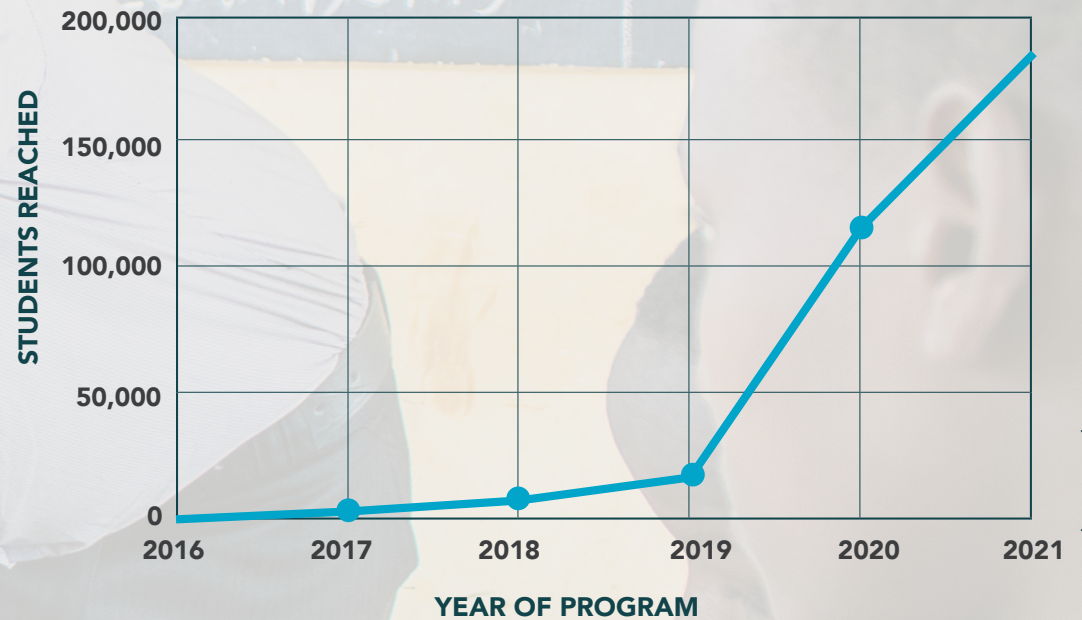

Target 4.C: Increase the supply of qualified teachers in developing countries.

As teachers are a fundamental condition for guaranteeing quality education, teachers and educators should be empowered, adequately recruited and remunerated, motivated, professionally qualified, and supported within well-resourced, efficient and effectively governed systems.

STUDENTS REACHED SINCE PROGRAM **LAUNCH IN 2016.**

TeachUNITED | 2020 Impact Report

Our goal is to improve outcomes for **one million children by 2030.**

TeachUNITED is both on track and on mission to reach our goal **...and 2 million children by 2035.**

EMPOWERING POSITIVE CHANGE IN RURAL SCHOOLS

We are so grateful for the support from our community, which enabled us to provide urgent, in-the-moment support during the global pandemic. Crisis-response training delivered through our partnerships with state departments and ministries of education helped teachers gain the skills needed to deliver online and hybrid education. Newly developed digital content and tools allowed us to coach teachers virtually during school closures — even in off-grid areas, where teachers with connectivity issues joined first-ever virtual workshops.

Within a year of adversity came the seeds of greater benefit.

This year profoundly influenced our ability to empower positive change in small and rural school systems. Our reach grew 5x across all programs, and the shift to virtual coaching laid the groundwork for expansion to new countries. The hard work of our community delivered short-term aid during the pandemic while also helping build more resilient and equitable educational systems for small and rural communities around the world.

2020 Achievements

CLOSING LEARNING GAPS, EVEN IN THE PANDEMIC

Teachers have shown time and time again that, if supported with coaching, high-impact strategies, and a cohort of their peers, they will set and reach ambitious student outcome goals. Our Tanzania partner schools demonstrated this significantly in 2020 with higher growth scores; despite months-long school closures.

18%
higher student growth
score in literacy.*

21%
higher student growth
score in math.*

*In comparison to Tanzania control schools.

HELPING TEACHERS DEVELOP SKILLS TO KEEP STUDENTS ON TRACK

At the end of the program, 94% of TeachUNITED partner teachers in the United States reported they felt confident they could address the needs of students struggling academically. These skills are critical for accelerating growth to close learning gaps associated with school closures and disruptions.

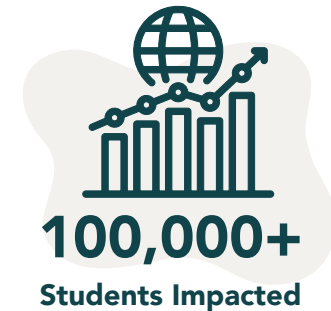

BUILDING SKILLS AND DRIVING FUNDS TO LOCAL COMMUNITIES

In the midst of the pandemic, the Latin America team secured an important partnership with the Universidad Nacional — bringing critical funds to a high-poverty region. Teachers who complete the program will now receive professional credit for their participation *and* a salary increase.

EXCEEDING GROWTH AND IMPACT MILESTONES

TeachUNITED exceeded a critical growth milestone in 2020 — we have impacted more than 100,000 students globally by supporting their teachers. This represents a **5x increase in global reach from 2019**. We are on track to reach our goal of ensuring one million students from small and rural school systems have access to a quality, equitable education by 2030.

EXPANDING PARTNERSHIPS FOR EDUCATIONAL IMPROVEMENT

In 2020, TeachUNITED was thrilled to develop two new and expanded partnerships to deliver a COVID crisis-response program. Our new partnerships with the Costa Rica Ministry of Education and the US Wyoming Department of Education allowed us to serve even more schools in each region, reaching almost 2,200 teachers total!

What We Do

THE SCHOOL ACCELERATOR PROGRAM | TeachUNITED empowers teachers and leaders with the high-impact strategies necessary to set and reach ambitious student academic goals.

PROVEN STRATEGIES FOR IMPROVING STUDENT OUTCOMES.

✔ COACHING

Research tells us that sustained instructional coaching is one of the most effective methods for improving instructional practice and student success. Coaching occurs during 1:1 calls, webinars, workshops, online course feedback, and small group PLCs.

✔ PEER LEARNING COMMUNITIES

Teachers support each other's professional growth and work collaboratively to improve student success.

✔ HIGH-IMPACT STRATEGIES

Strategies like building growth mindsets, personalized learning, and data-driven instruction improve student engagement and outcomes.

4-Step Process for School and District Transformation

TeachUNITED enters into formal partnership with schools and districts.

Education leaders and teachers work alongside coaches to develop engaging, student-centered classrooms driven by data.

Professional networks allow for ongoing collaboration, support, and leadership opportunities for teachers.

Teachers mentor others in their schools and districts for sustained growth.

We partner with regional and national governments to ensure change is integrated into school systems.

Why TeachUNITED?

What makes our program unique.

1.

Designed for small and rural school systems.

We fill gaps in access to teacher professional learning in historically overlooked communities.

2.

Accessible for any school, anywhere.

Our program is effective, regardless of community socioeconomic status or technological capability.

3.

Builds capacity, not dependency.

Our program is a comprehensive journey to build long-term capacity so change and skills are sustained within schools.

4.

Evidence-based and data-driven model.

We rigorously measure and test our research-based model to ensure teachers develop skills that have the greatest impact on kids.

5.

Tested, proven, and effective.

Across multiple regions, our program consistently demonstrates meaningful impact for teachers and students.

What You Measure, Matters

RIGOROUS PROGRAM MEASUREMENT ENSURES A MEANINGFUL IMPACT ON STUDENT AND EDUCATOR SUCCESS.

A PARTNER IN DATA

We work with our partner schools to determine which assessments, metrics, and measures of success are most important to them. We make sure to collect the data that really matters.

EMBEDDED AND SCHEDULED

Data collection is built into the program. Our Monitoring and Evaluation (M&E) team and coaches work closely with district and school partners to gather data on the schedule that works best for teachers and students.

MULTI-LEVEL DATA

Student and teacher data is collected in multiple forms, allowing schools to track measurable outcomes for their entire community.

SHARING RESULTS

When data is collected and analyzed, we share results with our partner schools and districts so that everyone can learn together.

CONTROL SCHOOLS

Data is collected from control schools with similar attributes to partner schools to compare student outcomes for a complete understanding of program success.

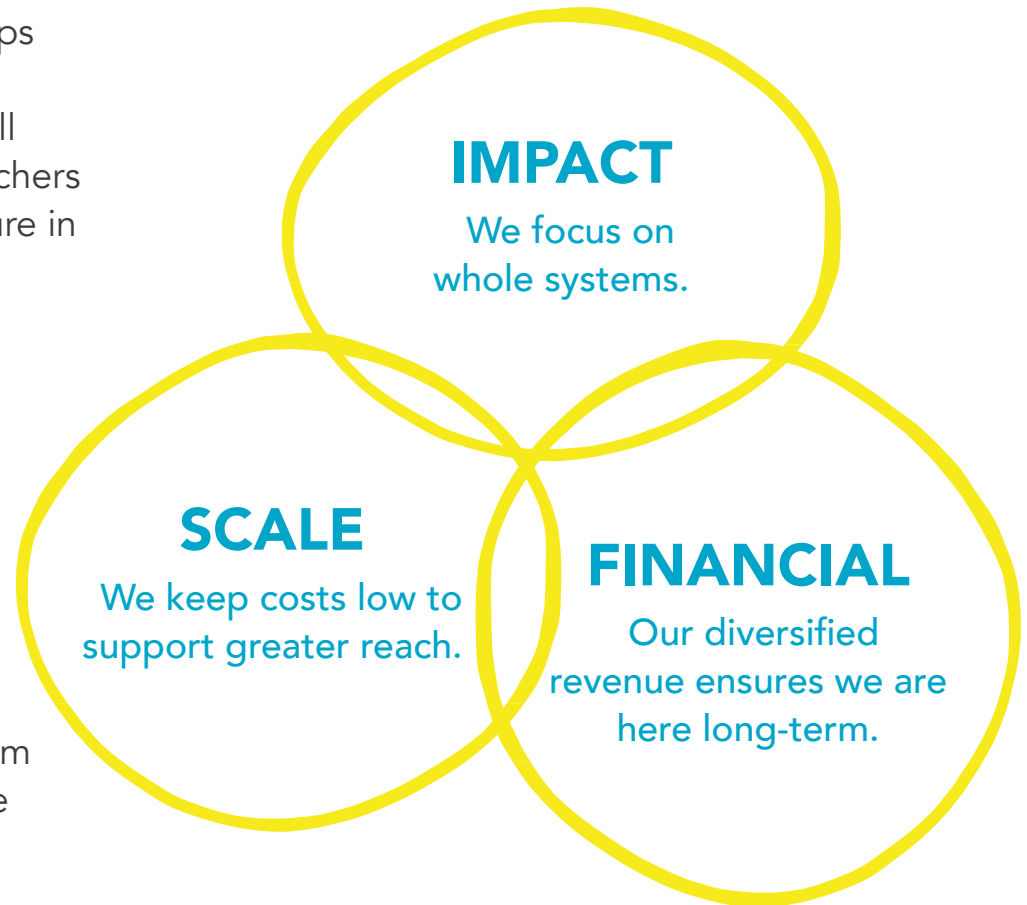

OUR MODEL TO GET TO THERE

We support schools, districts, and government education systems to shift toward a more effective model for teaching and learning.

IMPACT. Our multi-year model and partnerships allow us to saturate a district, state, or region to create systemic change. Starting with a small cohort of teachers per site in year-1, those teachers become mentors to others to shift school culture in year-2 and beyond.

SCALE. In five years, our reach has grown 60x. Participating schools across three unique regions have seen meaningful improvements in teacher efficacy and student outcomes for **less than \$30/child per year.**

FINANCIAL. With diverse revenue streams from school and government partnerships alongside philanthropic support, our sustainable revenue model meets our mission and scaling goals.

Where We Work

Our program can be implemented in any rural setting — even in remote, off-grid schools.

As a criteria for scaling, TeachUNITED has tested the efficacy of our model by operating in countries with diverse cultures and socioeconomic factors.

EAST AFRICA

- » Teachers participated in first-ever virtual workshops, overcoming substantial connectivity issues.
- » **Double-digit growth scores** compared to control students in math and literacy, despite months-long school closures.
- » From 2018 to 2020, TU secondary schools in Tanzania averaged a 23% increase in their national exam pass rate and a 25% increase in girls' pass rates.

LATIN AMERICA

- » **3x increase in program reach**, impacting 10,000 students in 2020.
- » Implemented a new short-term, crisis-response program to help hundreds of teachers develop digital instructional skills.

UNITED STATES

- » **10x increase in program reach**, impacting nearly 60,000 students in 2020.
- » Statewide partnership with the Wyoming Department of Education.

2020 Impact Spotlights

COMMUNITY PARTNERSHIPS TO OVERCOME CHALLENGES, BUILD RESILIENCE

The Challenge

In the United States, as many of the nation's schools and districts grappled with how to quickly turn to remote or hybrid learning during the COVID-19 pandemic, small and rural districts found additional challenges unique to their communities, their students, and their educators. The Wyoming Department of Education recognized those challenges and acted quickly to ensure teachers felt prepared to serve students' individual learning during this year, no matter where the learning occurred.

The Response

In the 2020-2021 school year, thousands of teachers across Wyoming participated in TU's professional development programs. With cohorts of their peers, they learned and applied best instructional practices and received individualized feedback. Focusing on adaptable, blended, and virtual strategies, TU coaches supported teachers through the challenges of teaching and learning during a pandemic.

THE RESULTS — WYOMING DEPARTMENT OF EDUCATION PARTNERSHIP

94%

of educators reported that the course had a positive impact on their teaching practice.

100%

of educators reported they were confident in their ability to implement new teaching strategies by the end of the course.

94%

of educators said they were confident integrating technology into their classroom by the end of the course.

“I enjoyed this course because of all the resources that were brought to my attention. I was able to see connections across my practice and within the sources, which brought a sense of pride for my lessons and creations within the classroom.”

— Teacher, Wind River High School
(Pavillion, Wyoming)

2020 Impact Spotlights

EMPOWERING TEACHERS AS LEADERS

Born in Saraquipí, Costa Rica, Ericka Peralta Jimenez has been a teacher for 10 years. Selected as “TU Teacher of the Year” in 2019 due to her outstanding commitment, Ericka completed the TeachUNITED program and then continued to support other teachers in the region through our local alumni network.

Ericka has been an incredibly important resource and a model for teachers in the community, especially during the pandemic. As TU coaches implemented the program virtually due to school closures, Ericka used her knowledge from completing the TeachUNITED coaching program and acted as a resource during the pandemic. She answered questions, helped teachers overcome challenges, and supported teacher success in delivering high-quality, effective online learning experiences.

Ericka has shown that, collectively, teachers can support and mentor each other to transform teaching and learning.

“Teaching is a gift. Teachers can make a positive impact that is carried forever in the hearts and minds of students. That is why it is so important to model positive examples for our colleagues. Only by working together and supporting each other can we make sure that students from our community succeed.”

— Ericka Peralta Jimenez, Costa Rica

BE THE TEACHER THAT CHANGES LIVES

When he was young, Jonas Ngowi was not interested in school. He did not feel motivated or understand the importance of learning — until a very important teacher changed his life. Jonas was inspired to become a teacher and help kids like himself who were struggling in school.

Jonas volunteered for the TeachUNITED program in Tanzania because he wanted to inspire his students to be successful, but he found that he struggled to understand how to get students to engage in lessons and ask questions. The skills taught by TU coaches gave Jonas, who already cared deeply for his students, the tools to reach them in a more effective way.

Through his work and dedication, Jonas is transforming his community by ensuring that his students develop the motivation to learn so they can succeed in school and reach their full potential.

“When I was a child, I was not interested in school. But I had a great teacher and he made me who I am today. The objective of being a teacher is not to give the student a uniform. It is to help them one day be our ambassadors. So when they are proud and have a job in a bank, or a hospital, or the market, they will say, ‘My teacher helped me be who I am today in the community.’ They may have a house or car, but I want them to know how to live!”

— Jonas Ngowi, Tanzania

Our Staff

We welcomed several new team members this past year to effectively respond to the growing demand for our model and accelerate our scaling strategy. Our staff is based in the United States, Latin America, and East Africa. TeachUNITED benefits from its strong local leadership and extensive experience in education.

GLOBAL OPERATIONS & U.S. TEAM

- Armando José Bello Guzmán**, Operations Manager and M&E Associate
- Mikel Webb**, Instructional Coach
- Herlinda Alvarez**, Junior Coach

In January 2020, we welcomed our international team to the TeachUNITED headquarters in Fort Collins, Colorado, for a week-long training and retreat. Among learning new techniques and strategies to support teachers and students, we had an all-day site visit at our partner schools in Estes Park, and Otterbox hosted us for a lunch and learn with their staff.

We are immensely grateful to **Kelly and Dave Burke** for their generosity in making this a meaningful and special opportunity to learn and connect with our colleagues. A special thanks to **Otterbox** for hosting us at their headquarters.

“Teacher coaching is at the top of the list of effective levers to improve student outcomes. I find it particularly compelling that TeachUNITED is bringing its experience to rural communities. They are continually building on the remarkably strong outcomes they are getting in the schools in which they work. The organization, at the cusp of significant scale, is a strong program that has the potential to reach children in rural communities all over the country and the world.”

—Stephanie Cornell, Board Chair
